<ul style="list-style-type: none"><li>As an intern I created a dashboard using Power BI based on the Superstore Dataset provided by the company.</li><li>I went through a training session of 2 months where I was taught Power BI, Tableau and Excel.</li><li>Using the ETL process the data was used for making the dashboard for performing sales analysis.</li></ul>	

## PROJECTS

### Garbage Management System:

- Garbage Management System is built using AngularJS, Php, Bootstrap, HTML, CSS and using MySQL as database.
- The idea behind this project is to manage the garbage collection done by BMC everyday by creating a communication platform for BMC head office, Garbage collecting drivers and locals.
- **GitHub Link:** <https://github.com/DivyeshGawad/Garbage-Management-System>

### EPass :

- Bus Ticket Booking System is basically used for booking Season Pass and verify it using QR Code.
- The Technology used are PHP, HTML, CSS & MySQL.
- **GitHub Link:** <https://github.com/DivyeshGawad/E-Pass>

### Crime Station :

- Online Crime Report System is basically used for registration of user complaints related to criminal activities.
- The Technology used are PHP, HTML, CSS & MySQL.
- **GitHub Link:** <https://github.com/DivyeshGawad/Crime-Station>
